 Sam McLenegan 717-602-4577
 Walt Heister 717-832-7278/ 717-439-0244
 Henry Spangler 717-944-6387
 Bob Whiteman 717-877-9832
 Neil Matz 717-939-6025
 Chris Rosing 717-686-0109

NEWS LETTER EDITOR— DAN MCNEIL II- krcs.news@gmail.com

FROM THE PRESIDENT

Looks like the flying season is winding down, but not going out without a bang! As you can see from the photo, Bill Moore made sure the chilly mornings are a little more comfortable. I don't have to go camping to sit by a fire. Tuck brought Marshmallows, nice. Several events and changes coming up:

The November meeting will be held in Bob Krehling's company lunch room.
 Krehling Counter Tops
 1399 Hagy Way
 Harrisburg, PA 17110

(Near the post office on Elmerton Ave in the area of the Farm Show Complex)
 Bob's cell # if you get lost 576-7750

We will hold our annual Christmas party at a venue to be determined by next meeting. Likely on Tuesday, December 22nd. From 10 to 1.

As you put your planes away be sure to keep some indoor stuff out as we will be doing both the Hershey arena and SpookNook this winter. (details to follow)

This was a great flying year with lots of participation and a few new members. Remember, elections for

Officers at the December Meeting.

As a side note, keep Dan McNeil in your prayers as he finally has his surgery.

Jim Geiger

New Member voted in by the club:

Elections in December Meeting:

Regal airport event was well supported.

Meeting adjourn: Mark, Verna 7:23

50/50: Bud S.

By: Bryant Maddrick JACKSON TOWNSHIP, Pa.

-- Unmanned aerial vehicles, more commonly known as drones are growing in popularity. The devices are a popular way to pass time for many people like Bob Whiteman. "There's generally a common interest in aircraft, whether it be helicopters, airplanes, what have you," Whiteman said. But flying certain types of drones will require registration from the federal government. The move comes after an increase in reported close calls, including one four miles from the York Airport in August that involved a pilot Dave Myers was training. "The drone came right over top the airplane. And he was at 1,500 feet," Myers said. According to the Federal Aviation Administration, drones should fly below 400 feet. Myers trains pilots at York Flight Training. He says if a drone strikes a plane, it could cause a lot of damage. "Airplanes are like, I don't want to say beer cans, they're just thin aluminum that something like that would just puncture the airplane," Myers said. The FAA and the transportation department plan to set up a task force with government and industry officials, as well as hobbyists to recommend which drones should be regulated. Bob Whiteman, member of the Keystone Radio Control Society, says it's unfortunate some people use drones in a reckless way, but he's not sure regulating drones will fix the problem. "It's really the behavior. It's not the object," Whiteman said. Myers thinks people buying drones should undergo training. Whiteman says his group offers just that. The federal government is expected to release a report with recommended regulations in November.
